Neighborsheds

circular patterns

A Regenerative Accelerationism Pilot

Creating a digital ecosystem to enable community-formation infrastructure so domain members can reorient to *"live on the doughnut."*

Proposed by

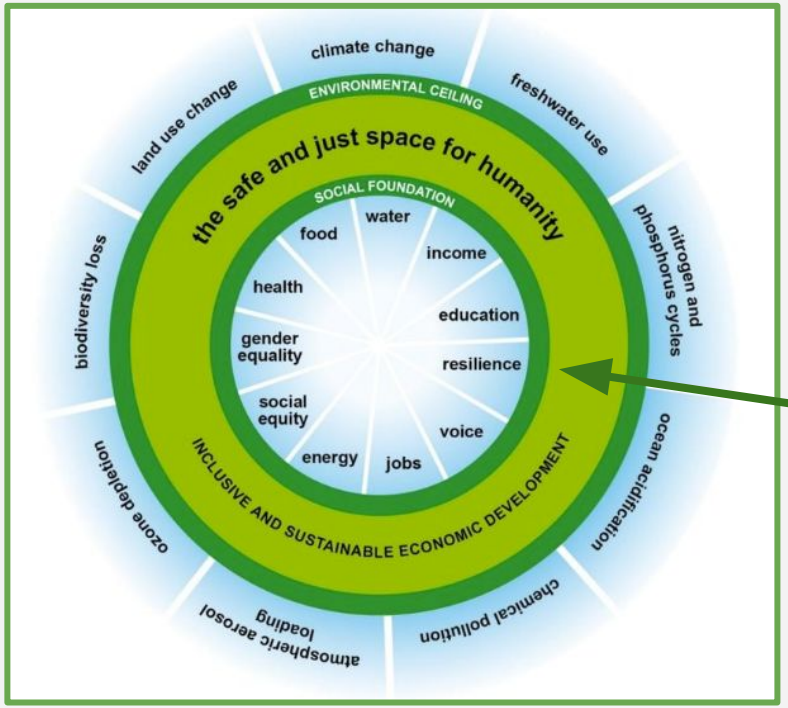

Tracey Rogers Brandt ***and friends***

tracey@circularpatterns.com

May 2026

Doughnut Economics Applied

Neighborshed domains create the context for living on the doughnut

In 2017 Kate Raworth published* a visual framework designed to balance human well-being with planetary boundaries.

Instead of endless GDP growth, it reorients human society to live within the ecological limits of Earth by aiming for the space between the two rings.

The outer ring is the ecological ceiling and inner ring the social contract for humans to thrive and flourish.

*Raworth, Kate *Doughnut Economics: Seven Ways to Think Like a 21st-Century Economist*

Provocation

How can we enable **protocols, *NOT PLATFORMS***, to support any community ready “live on the doughnut,” to restore their ecosystem, creating the conditions for **a new social contract and culture to emerge**?

Protocols founded upon regenerative principles and intentions, that can reorient culture, **status symbols** and what it means ***“to be”*** and ***“to work.”***

Your Invitation

Support a systems-based, regenerative accelerationism alpha pilot, for a multi-disciplined collaboration, based on a meta-relational AI framework, within the **context of restoring ecological health** for trial domains.

Enable the missing layer of the internet—**community trust**, that was never built, to emerge.

Support the creation of community-formation infrastructure , turning **existing human communities into civic power.**

Neighborshed Domains Are…

Regenerative digital and geographical **places**, **where all life belongs,** and there are no unaccounted externalities.

Digital ecosystem building tools, to enable **domain** members to communicate, organize, share, learn, govern and ensure circular longevity, of care based economic models, **based on community trust.**

A new social contract, matching **offers to needs** and fostering **belonging and hope** for **domain** members**.**

Neighborshed Domains Enable

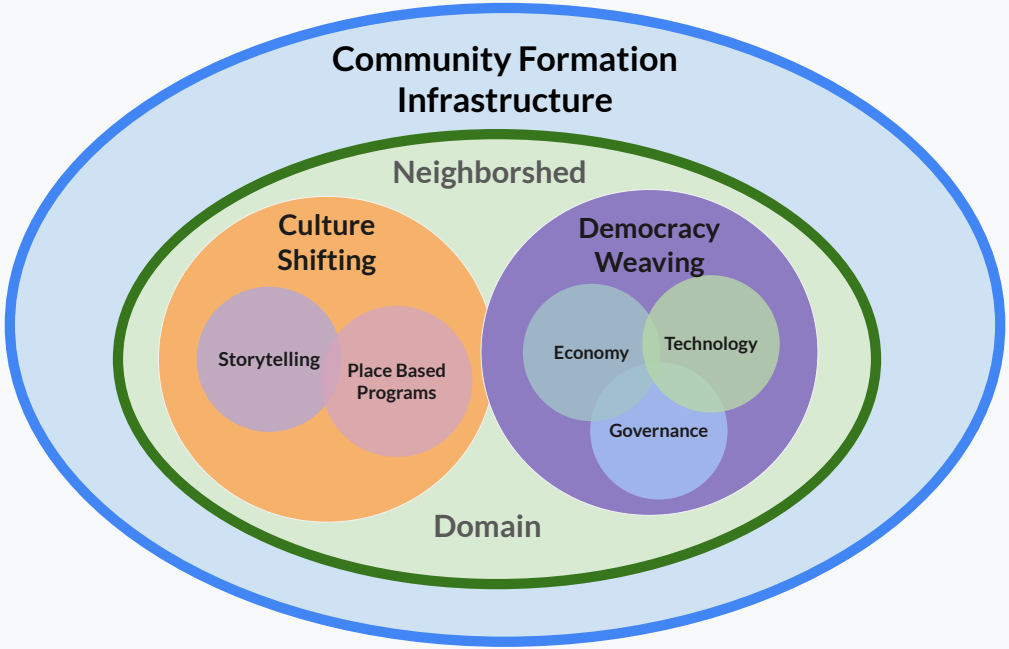

Emergence of regenerative status symbols based upon care and service of domains

Empowered Members

Neighborshed members are:

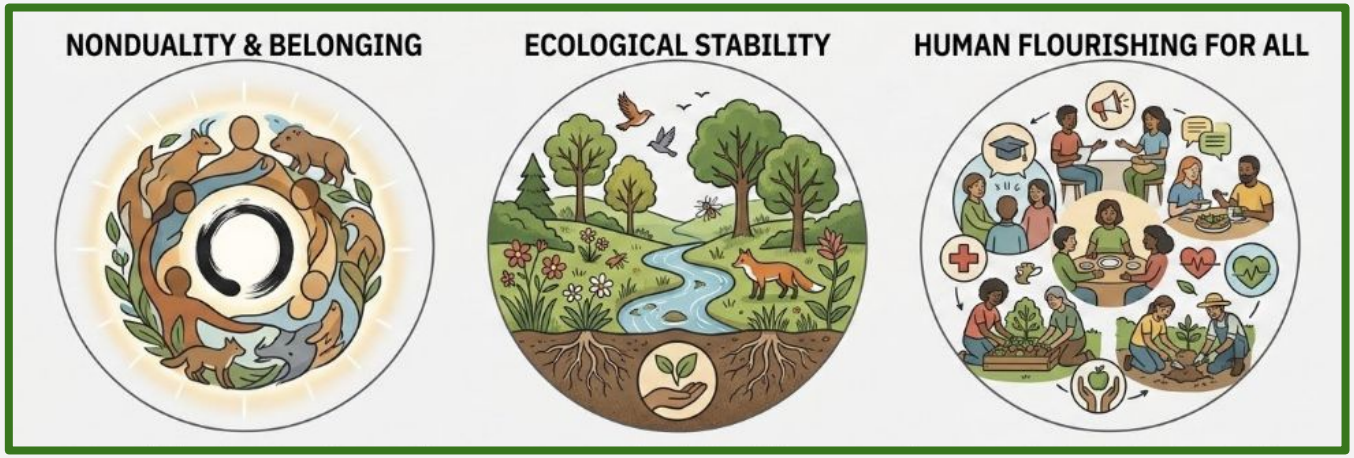

- Connected
- Resourced
- Trusted

While building out their domain infrastructure.

Status Symbols Drive Change

Neighborshed domains grow new status symbols for members

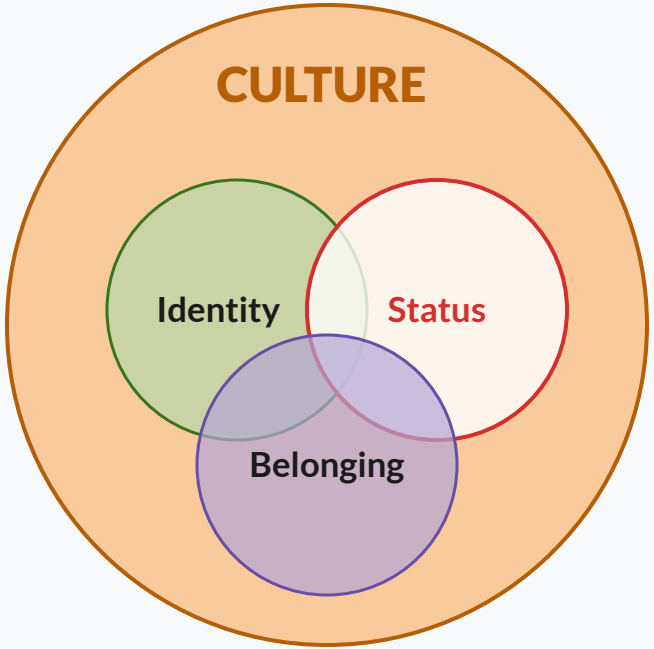

Sprawling private estate,
asset hoarding,
multi-property ownership.

Members' Neighborshed identity and status, is derived from their supportive actions, for living on the doughnut.

Culture Shifting Based On Systems Science

Culture change is fundamental to catalyzing a regenerative future and movement

Culture

Provides the framework of shared norms and values.

Identity

How we interpret norms to define ourselves.

Status

Reflects where we rank within cultural frameworks.

Belonging

Emotional validation from being accepted within them.

Shifting Culture

Neighborsheds Reorient Shared Beliefs and "Rules" With New Status Symbols

Culture (The Foundation)

The overarching system of shared beliefs, languages, behaviors, and traditions. **It defines the acceptable "rules" of a society or group.**

Identity (The Self)

The answer to "Who am I?". Formed by **how you internalize or reject your culture,** combined with personal traits and experiences.

Status (The Hierarchy)

Dictates perceived value, power, or rank. **Impacts how easily individuals are accepted or respected in a given community.**

Belonging (The Connection)

The innate human need to feel safe and connected. **Often experienced when identity aligns with culture or is validated by a community.**

Culture Shifting Practices

Rewilding is a gateway practice to a regenerative future

4 R's Rewilding Framework

Problem Algorithmic gaslighting maximizing attention capture, has resulted in populations who conform to norms, hoping to maintain or obtain **coveted status symbols**, in hopes of belonging.

Response Rewilding practices that "**liberate life,**" heal and generate new relationships. Rewilding urban and suburban landscapes to grow healthy topsoil can also **widen "mindscapes" to embrace nonduality.**

Rewilding

The opposite of separation from, and control of, nature

Restore

Beginning with healthy topsoil that holds water, carbon and biodiversity.

Regenerate

Build circularity and regional supply chains that value grown versus mined feedstocks

Relate

Belonging without othering for all life, human and nonhuman, without any “externalities”

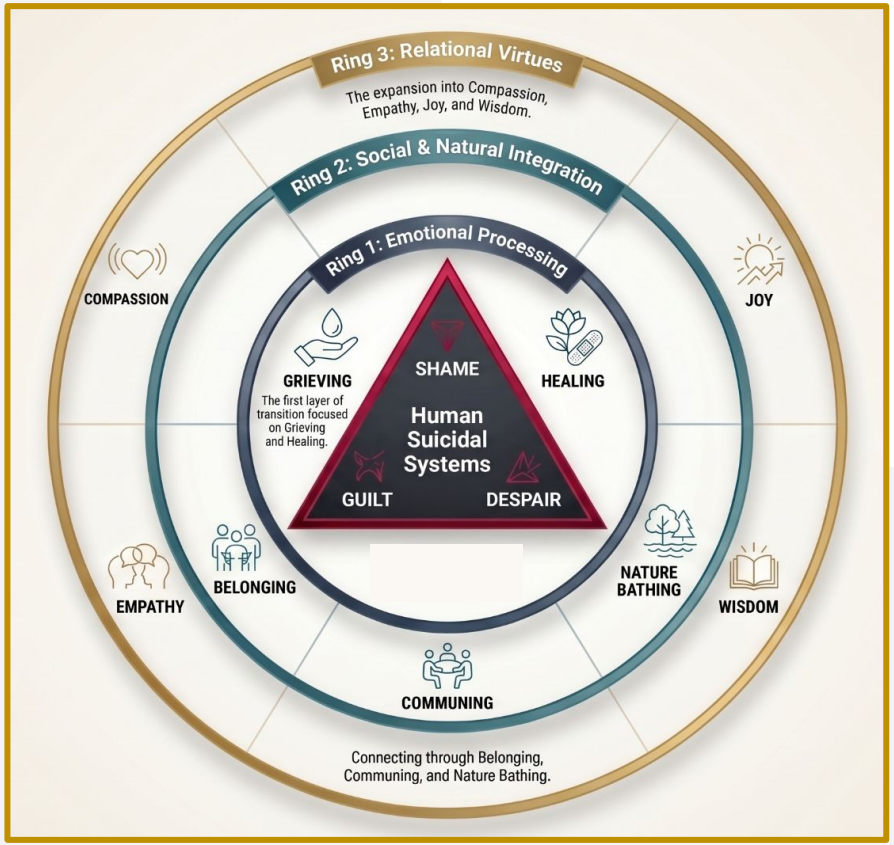

Reimagine

Reorient “to be” and “to work” in alignment as a planet positive, life affirming species.

Neighborshed rewilding programs, supported by storytelling, technology and economics, enable a care based framework of shared norms and values **based on community trust.**

Rewilding Heals

Neighborsheds offer a **safe** domain, **based on community trust,** for new members to grieve and heal, in order to become present, embodied and ready to show up for whatever arrives.

circular patterns

Rewilding Invites Belonging & Nonduality

Neighborshed members rewild domains served, to heal, revitalize and regenerate **relationships with all life.**

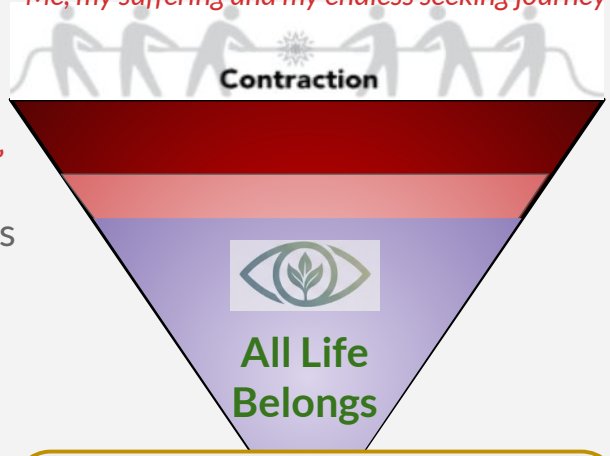

Misperception of a Dual Reality

"Me, my suffering and my endless seeking journey"

Fear

"What I avoid that would destroy me"

ie - Loneliness

Desire

"What I seek that would complete me"

ie - Intimacy

Nonduality Life
A lived experience of interconnectedness beyond duality, **fueled by universal belonging.**

Cultural Alignment

Neighborshed members feel safe, accepted, and connected

Identity

Establishes digital identity as a Neighborshed Member

Neighborshed “needs” matched with members’ “offers”

Steward, caregiver, participant and citizen roles are valued over consumer

Status

Based upon r**egenerative care economy symbols**

Increases with service actions not accumulated “things”

Wealth is measured in relationships and generosity metrics

Belonging

Members are vetted to establish trust levels

Members feel safe, accepted, and connected

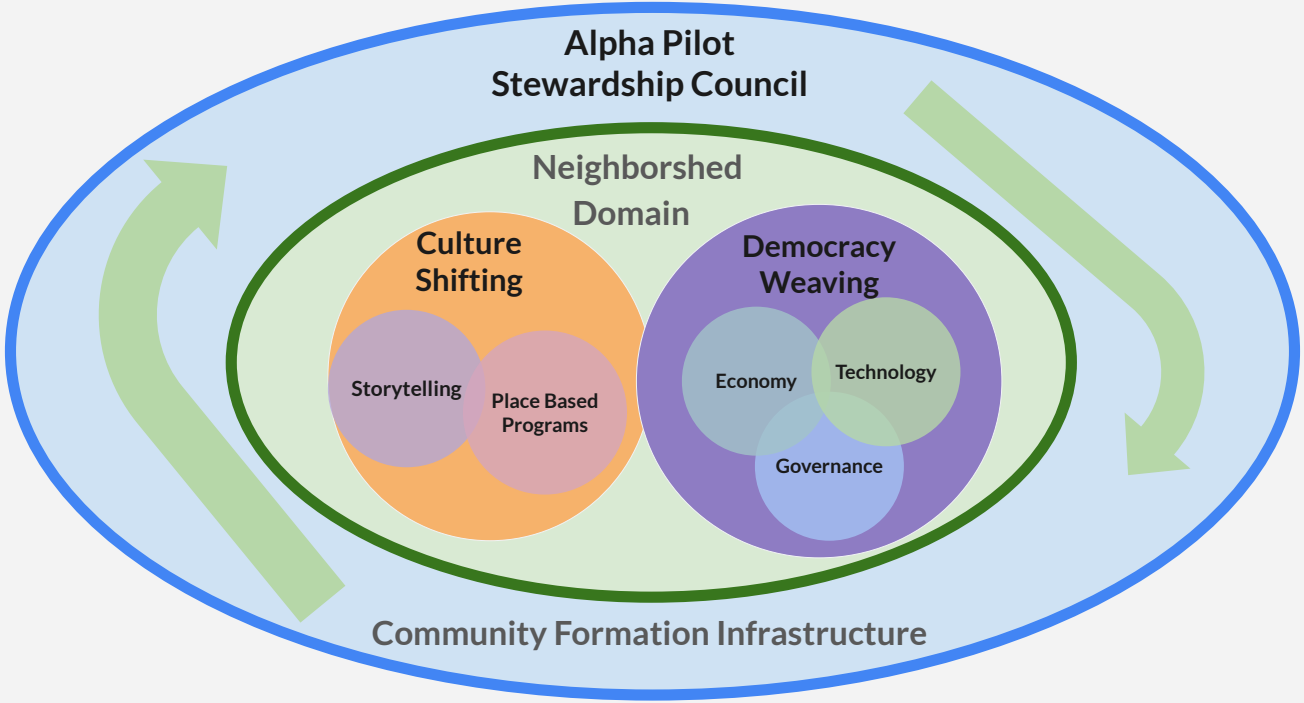

Democratic values, citizen assemblies, DEI anchored governance councils

Introducing A **R**egenerative **A**ccelerationism **A**lpha **P**ilot (RAAP)

Neighborsheds

Interdisciplinary framework for a holistic, systems based experimental pilot

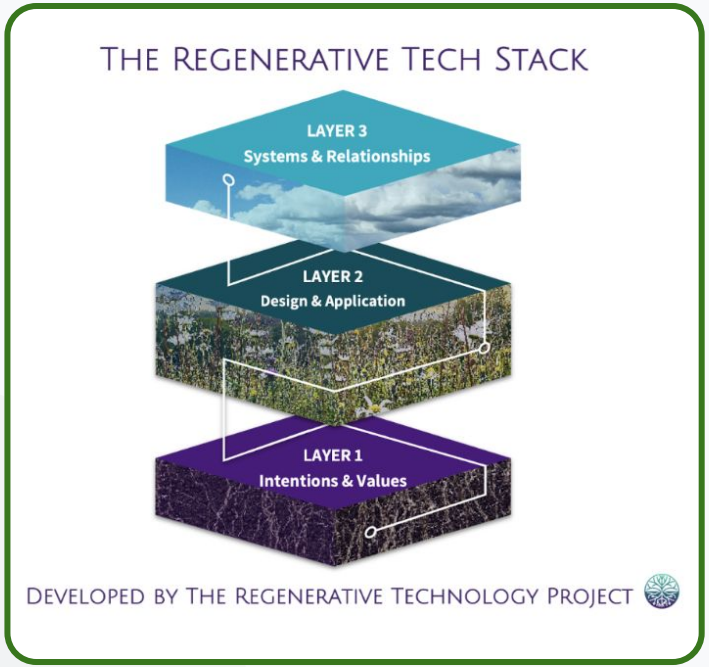

Emergence Potential

Regenerative
Accelerationism
Engineering
Task
Force
(RAETF)

Modeled after the Internet Engineering Task Force (IETF).

Apply Regen Tech Stack Design Logic

For each of the Neighborshed disciplines

For each discipline we ask:

- Who is this for?
- Who decides?
- Who benefits?
- Who bears the risk?
- What counts as success?

Intentions & Values

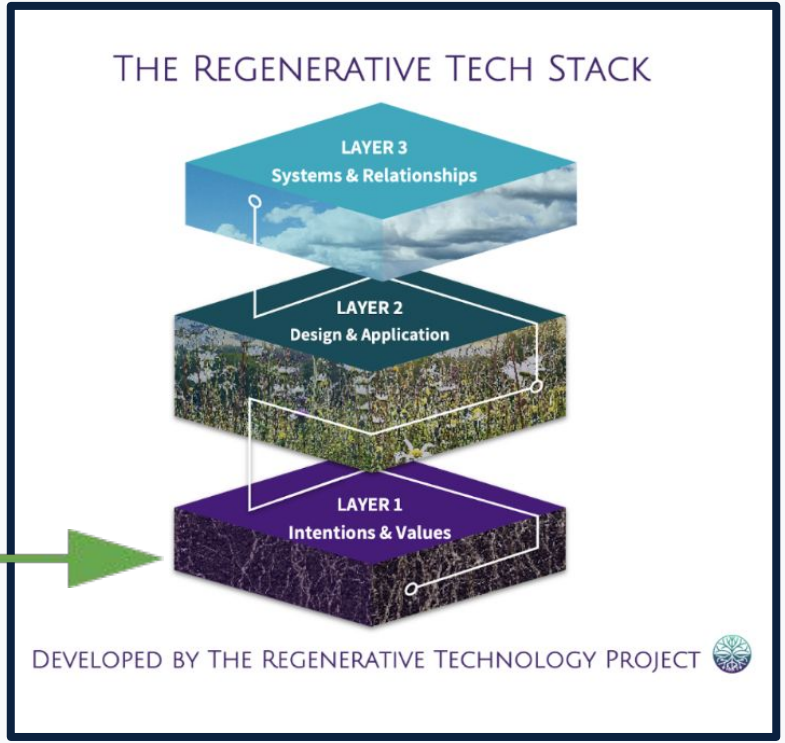

Technology to Enable a Neighborsheds Pilot

First Person Project (FPP)

Provides proof of personhood via Verifiable Trust Communities (VTC) for each Neighborshed.

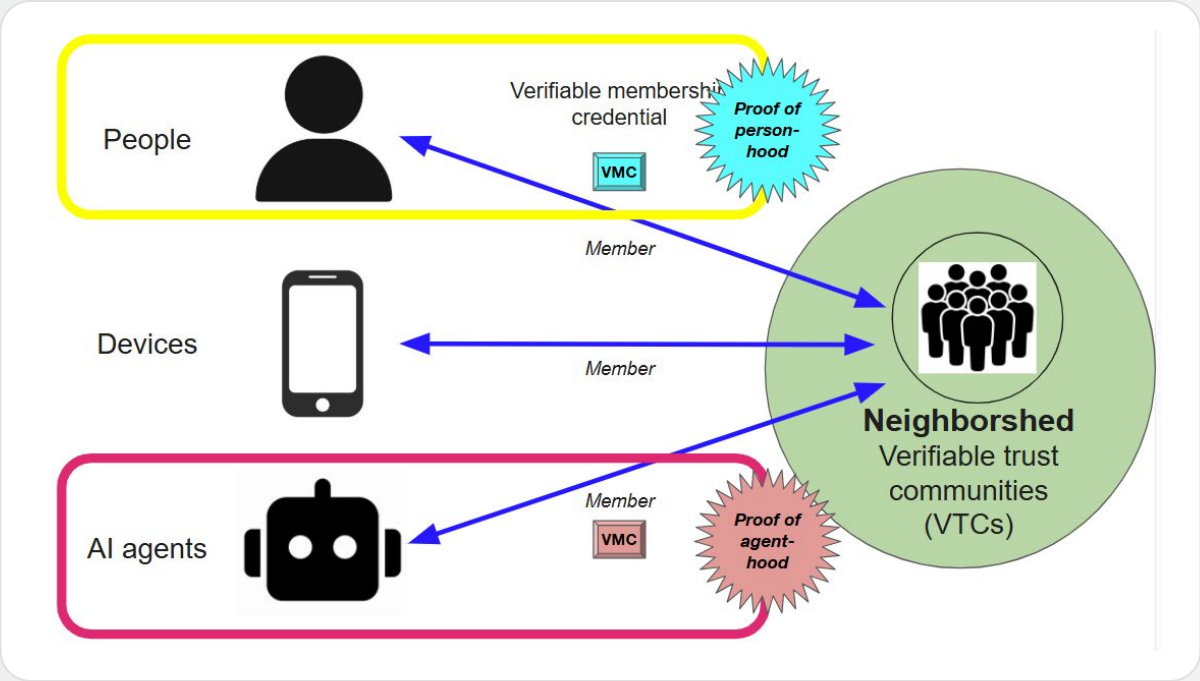

Doughnut Economic Regenerative Rubric (DERR)

Way of being context, for Neighborshed members to serve their domain wholly, where success is the balance and stability of domains served.

First Person Project (FPP)

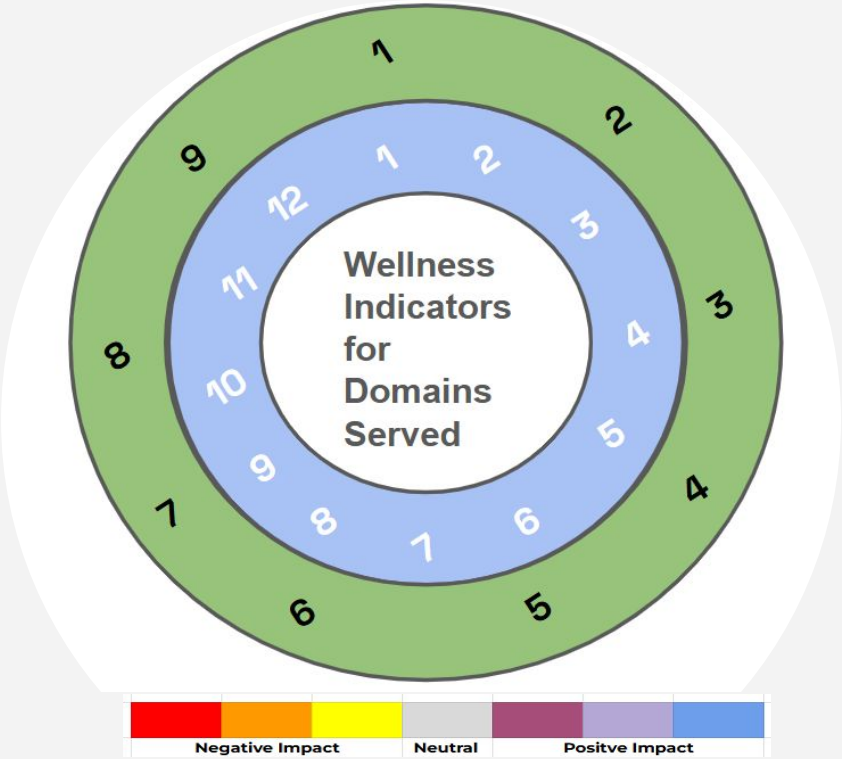

Technology to Enable a Neighborsheds Pilot

FPP provides **values aligned** digital identity required for economics and governance trials.

Doughnut Economic Regenerative Rubric (DERR)

Technology to enable Neighborshed domains to live on the doughnut

A universal DERR provides **values aligned reorientation** from industry, towards community and biosphere process wellness indicators, or ***helps members live on the doughnut.***

Biosphere Wellness = 1 - 9

Community Wellness = 1 - 12

DERR Knowledge Base

Domain based data to provide restoration plans for living on the doughnut

Indigenous History Cultural lineage & ancestral wisdom	**Geology** Lithosphere & soil foundations	**Water Storage** Aquifers & reservoir health	**Population** Capacity & carrying density
Ownership History Land tenure & legal shifts	**Climate History** Atmospheric patterns	**Bioregional** Ecosystemic connectivity	**Demographics** Age, diversity & flow
Use History Industry & ecological impact	**Water Flows** Hydrological movement	**Geopolitical** Governance & civic ties	**Governance** Decision-making structures

Universal DERR Use Case

With **community-formation infrastructure** and meta-relational AI frameworks, a universal Doughnut Economic Regenerative Rubric (DERR) empowers Neighborshed members to serve the regenerative needs of their domain.

Dynamic Matching

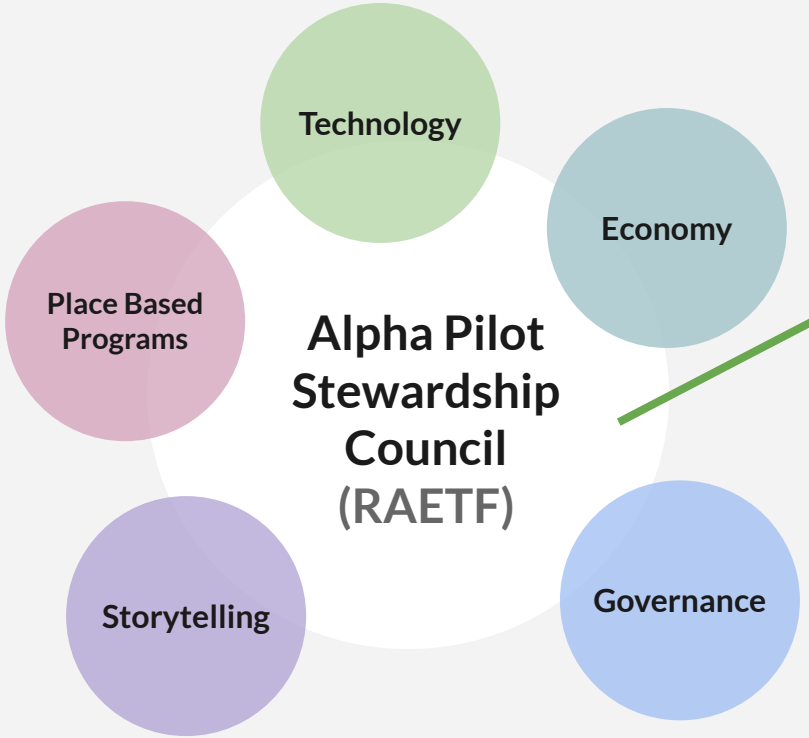

Unique offers (skills, interests, passions) are matched to real-time regenerative needs determined by the universal DERR.

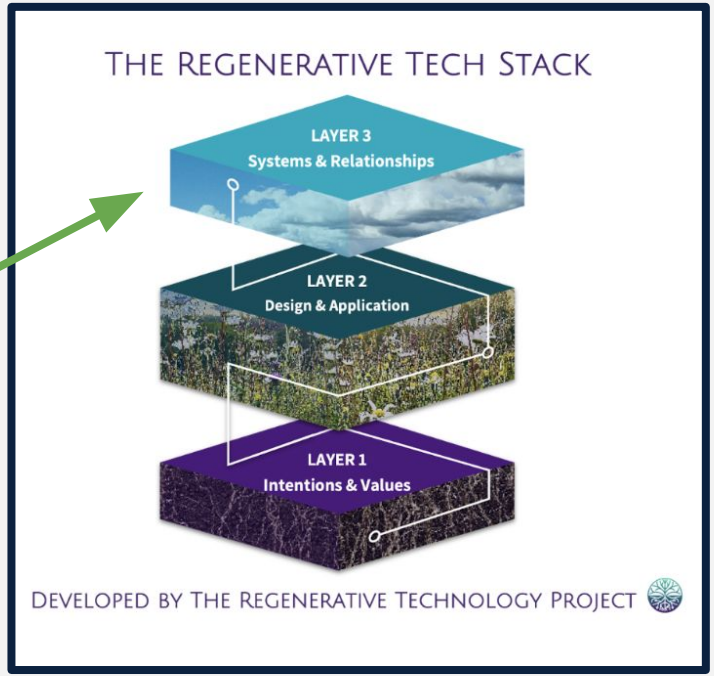

Value Creation

Member's actions create **value claims** for affiliated Neighborsheds, driving community-wide restoration.

Systems & Relationships

Form a Stewardship Council with intentions to midwife the RAETF

Pilot Stewardship Council

Serves as the Regenerative Accelerationism Engineering Task Force (RAETF)

RAETF recognizes the complex reality that each discipline is embedded within other systems, contexts, disciplines and relationships, and in turn are influencing and influenced by them. RAETF treats complexity is design input, not downstream surprises.

Coordination

How do disciplines coordinate (not separate) people?

Amplification

What behaviors do they amplify?

Agency

Who gains and loses agency?

Systemic Impact

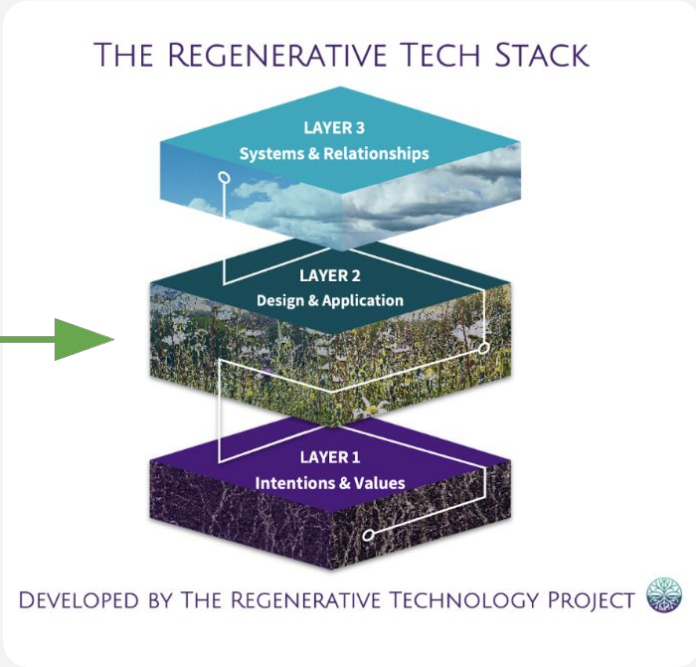

What patterns do they stabilize or disrupt?

Design & Application

Technology to Enable a Neighborsheds Pilot

Regenerative design and application principles informed by intentions and values, translate into concrete choices:

- **Circularity** instead of planned obsolescence
- **Local participation**, not centralized control
- **Open standards** instead of proprietary lock-in
- **Community ownership** not extractive platforms
- **Transparency** instead of black boxes

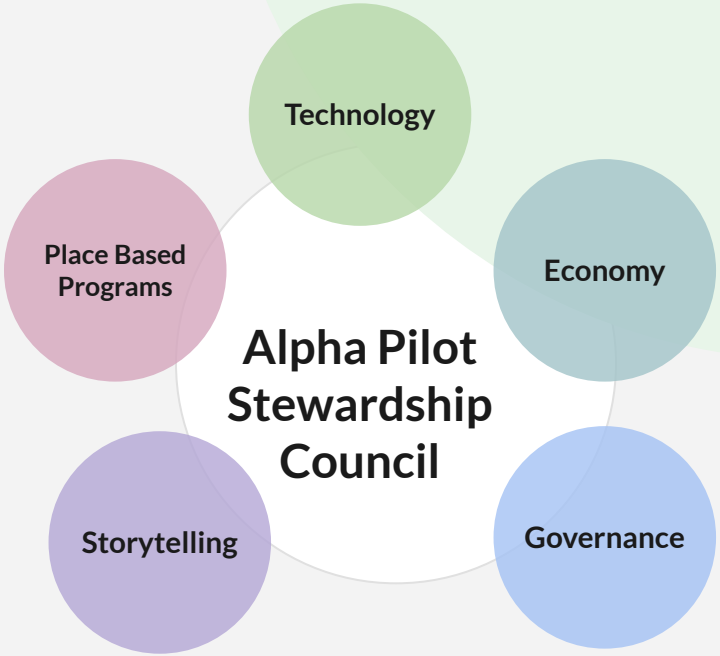

HOW DO WE BEGIN DESIGNING RAAP?

Host an upside down Unconference

Curated with purpose

- ➔ 5 sessions, one for each discipline
- ➔ Each session co-hosted by Regen Acc working group
- ➔ Each session includes prompt or presentation, followed by a design session for the discipline
- ➔ The IRL event is by invitation, and complimentary to attend

Who do we want in the room?

Helping us design a Regenerative Accelerationism Alpha Pilot (RAAP)

Funding Partners

Value aligned, potential funding partners for the pilot and beyond.

Knowledge Holders

Indigenous organizations and traditional ecological knowledge holders.

Subject matter experts for each discipline.

Civic & Justice Orgs

Civic orgs, Social Justice, Environmental Justice, Regenerative Agriculture, Agroforestry, Rewilding, and more.

The room is the intelligence and together, led by a Regenerative Accelerationism Working Group, we will design a systems based Alpha Pilot ready to be funded.

What do we want from the room?

Help with design and recipe creation

Attention

A vision this massive will demand focused attention.

Imagination

Imagineering a new world ordering, based on care not acquisition and ownership, demands an open mind.

Participation

Space will be limited. If you take a spot, plan to engage with us during the time spent with us.

We seek doers and dreamers who want to support us in creating conditions, for anyone ready to become a “Regenerate,” to be welcomed and supported in their journey.

Creating Recipes

From an "Upside down Unconference" to design RAPP

Recipes that specify supplies and resources needed, to match each discipline's needs, for enabling the "**Go-To-Market" trial**, of Alpha level technology and domain based programs, prioritizing:

Circularity

Prioritizing renewable, grown biomass (agriculture, forestry, algae) over mined resources (fossil fuels, metals), **to reduce reliance on finite materials and reduce greenhouse gas emissions.**

Monitoring

Establishing baseline metrics for domains served, **monitoring regenerative impact from programs.**

Learning

Creating actionable plans from data gathered **to enable rapid development of a BETA program** to offer to any community ready to reorient.

Alpha Pilot Inquiries and Trials

Wellness-Based Orientation

How to live into an orientation based on wellness indicators for domains served, as opposed to industry based indicators.

Engagement Efficacy

Testing efficacy of stories and engagement strategies (messaging, CTA, user journeys) and impact of programs, with audiences.

Trust Protocols

Trialing trust layers and protocols for enabling programs, democratic governance and economics, for domains served.

Neighborshed Discipline Inquiries and Trials

Care-Based Economics

Develop and trial economic models centered on participation of care and service within community domains where actions generate value claims for members from affiliated Neighborsheds.

DEI & Governance

Trial DEI-based governance structures and the implementation of citizen assemblies, to democratically manage technology, economics and domain wellness.

Regenerative Finance

- **Bioregional FUNNEL Funding***
- **Regenerative Reverse Mortgages***
- Outcome-Based & Nature-Backed Instruments
- Community & Mission-First Funding
- Web3 & Blockchain-Native ReFi

Next Steps

Moving from vision to action

Fundraising

Identify sponsor/funder for the “Upside Down Unconference”

Community Building

Consider options for inviting “regenerates” to become findable and connected ASAP.

Begin Planning the Unconference

- Venue & Date Selection
- Budget & Resource Allocation
- Guest List & Working Group Formation

Appendix

People need hope and to belong to feel good

> *"Business, like life, **is all about how you make people feel.** It's that simple, and it's that hard."*

~Danny Meyer

Founder and Executive Chairman of the Union Square Hospitality Group

Theory of change

Welcome everyone ready to trial living on the doughnut

Create conditions for anyone ready to care and serve the stability and sustainability of their domain, to **belong and feel supported on their journey of learning and doing.**

AWAKEN	REMEMBER	ACTIVATE	EMPOWER	SYMBIOSIS
From belonging and rewilding practices, to the moment humanity faces	Our biology and ecology as members of the universe of life	To reorient away from industry and towards "wellness indicators"	To serve our "domains" wholly, in order to reorient to live on the doughnut	Circularity and sovereignty for food, water, energy, sanitation and labor.

Technology Supports Domain Programs

Examples to illustrate interconnectedness and complexity

DERR Knowledge Base

Provides restoration ideas for growing healthy topsoil

↓

Action Plan

Identify landscapes with grass, plastic, dirt, etc., to replace with fresh tree mulch

↓

Outcomes

Increased biodiversity, water and carbon storage

Neighborshed Ecosystem

Matches members offers with “Action Plans”

↓

Mapping

Member talents/skills and resources with needs of action plans

↓

Outcomes

Members service actions create value claims.

Neighborshed Ecosystem

Creates recipes for supplies and labor needed for action plans.

↓

Ingredients

Prioritizes circularity and grown materials.

↓

Outcomes

Regenerative economic models.

Rewilding Action Plans

Supported by technology, members are empowered to restore the earth in their domain

Restoring soil health in urban and suburban domains provides an Alpha Pilot valuable data from participating humans in a trial domain. And soil is just the beginning…

Biomimicry

Nature based architecture and redevelopment.

Supply Chain

Prioritize circularity and grown (vs. mined) feedstocks.

Property

Nature backed transformation facilities for stewardship models.

Financing

Domain based funding flows based on VTC and DERR.

“Work”

Domain based care and service actions create more than UBI value.

We have a timeline

Many believe the U.S. is operating on a **“midterm clock”**, for time remaining to catalyze systemic changemaking with today’s freedoms.

The fuel shortage forecast to dramatically impact the U.S. beginning around **July 4th** may provide choke points to vet citizens and begin the “next phase.”

How can we invite everyone in favor of **Regenerative Accelerationism** to become findable and connected by joining something?

regenerates united guild

Manifesto

We are a group of concerned citizens, from around the Earth, who identify as being a member of the universe of life.

We **do not** believe we are separate from nature.

We **do not** believe othering any life form is acceptable behavior, in order to create benefit for an in group.

We believe all life belongs, and there are no externalities.

regenerates united guild

Manifesto

We support regenerative status symbols and “ *living on the doughnut*.”

We are dedicated to shifting culture with narrative story sharing and domain based programs.

We are dedicated to weaving democratic principles and values into technology, economics and governance.

regenerates united guild

Manifesto

We imagine a future society where identity and status is derived from supportive actions for living on the doughnut, as opposed to being based on money, markets and ownership.

We imagine a future world where meta-relational AI frameworks developed by a **“Frontier Lab For Life,”** assist humanity in the midwifing of a **“Regenerative Era” where restoring the earth becomes humanity’s central intention.**

regenerates united guild

Manifesto

We imagine a Regenerative Accelerationism Engineering Task Force (RAETF), modeled after the Internet Engineering Task Force (IETF), becoming the **group brain and driving force behind the foundational technologies that power the decentralized web of regenerate united guilds, all working to restore the earth.**

We believe all life deserves healthy water and food.

We believe just as homicide is a crime, so should the use of herbicide and pesticide.

regenerates united guild

Manifesto

We consider seven generations forward in our horizon thinking, dreaming, and planning.

We believe in justice, equity, diversity and inclusion, and that no human being is more worthy than others.

We believe all human beings have responsibility to citizen, care, participate and steward.

regenerates united guild

Manifesto

We believe freedom begins where work ends, from finding our personal intersections of passion, purpose, service and consciousness, **as we care for our domains wholly.**

~*~
